PRABHJOT SINGH

Chandigarh, India | +91-9915386025 | prabhjot7100.ca24@chitkara.edu.in | github.com/prabh234

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and MCA candidate (CGPA 9.4) with hands-on experience building production-grade web applications using Next.js, React, Node.js, and MySQL. Currently interning as a Frontend Developer at ITBD, delivering scalable UI solutions. Proven ability to independently architect and ship complex systems including a full Bench Management System and an event management platform with face recognition and QR-based attendance.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Radix UI

Backend: Node.js, Express.js, REST APIs, next-auth, Drizzle ORM, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB, NoSQL

Languages: JavaScript, TypeScript, Java, Python, C, C++

Tools & Platforms: Git, GitHub, Axios, WordPress, Vercel

PROFESSIONAL EXPERIENCE

Frontend Developer Intern | Innovation Technology by Design Pvt. Ltd. (ITBD) | Chandigarh, India *Oct 2025 – Present*

- Developing responsive, high-performance frontend interfaces using React.js and Next.js as part of a 6-month internship program.
- Collaborating with backend teams on RESTful API integration and UI/UX improvements within an Agile workflow.
- Working across multi-timezone shifts (IST/EST/PST) to support ITBD's global IT solutions and 24x7 helpdesk clients.
- Contributing to code quality, component reusability, and performance optimization in a production environment.

Freelance Web Developer | Self-Employed | Remote *Sep 2023 – Oct 2023*

- Designed and developed a fully functional client website using WordPress, customizing themes and plugins to specification.
- Ensured cross-browser compatibility, mobile responsiveness, and page-load performance optimization.

PROJECTS

Workforce BMS – Bench Management System *Solo Project*

Stack: Next.js 16 (TypeScript), React 19, MySQL, Drizzle ORM, Tailwind CSS, shadcn/ui, next-auth, Axios

- Architected and built a centralized workforce platform from scratch to manage candidates through onboarding, training, bench, alignment, assessments, and document workflows.
- Implemented a multi-stage assessment tracker (PRC + multi-round interviews), per-candidate skill maps (0–10 scale), and schedule management with automated age calculations.
- Built a Talent Search engine with multi-criteria filtering (location, experience, skills) and score-based ranking across all candidates.
- Designed a secure file management system using persistent storage outside the public directory; files streamed via authenticated API with friendly download names.

- Integrated role-based access control (RBAC) for secure navigation and API access, plus a phishing simulation campaign module with token-tracked landing pages.

EventMinder – Event Management Platform *Aug 2024 – Jan 2025*

Stack: Next.js, Prisma ORM, PostgreSQL | github.com/prabh234/eventminderv2

- Developed a full-stack event management system supporting role-based access for admins, teachers, and students.
- Built an attendance system with face recognition and QR code scanning/generation using device camera; auto-generated certificates of participation on event completion.
- Implemented attendance analytics dashboard for event hosts with visual reporting and filtering capabilities.
